Mfg. S.G. Iron, C.I. & Graded Casting

Sangam Technocast

INTRODUCTION

Since 2011, We belong to this casting manufacturing field S.G. Iron, Cast Iron in which for example Autoparts, Agriculture Parts, Machinery Parts, Electric Insulators, Pipe Fittings etc. casting we used to do. To provide better quality casting, we are continuously working on it. Our only aim is to give most satisfaction to our customers.

We are always ready to adopt new things and always ready to face new challenges. We are eager to adopt new technologies so we can provide better and better products to our clients. We upgrade ourselves continuously with latest technologies. Our team is working for giving maximum output of the production by minimum costing.

Sangam Technocast

PRODUCT PORTFOLIO

Our portfolio comprises following products

S. G. Iron Casting
C.I. Graded Casting
Tractor Part Casting
Auto Part Casting
Pressure Die Cast Machine Part Casting
Automobile Casting
Electric Power Insulator Casting

Salient features of our products are as follow

Sturdily constructed
Reliable
Durable
Dimensionally accurate
Corrosion resistant

Sangam Technocast

RAW MATERIAL AND TESTING INSTRUMENT

Premium quality of Raw Materials are used only for better casting. We are using Raw Materials after Testing.

Sand Tesing Instrument

A Stand which is used for the molding process, we use it for testing and checking of AFS. The Blnders used in it too we take afer only doing cross verification and proper testing. Then after the stand prepared for molding. We check such important features like GCS, compatibility.

Sangam Technocast

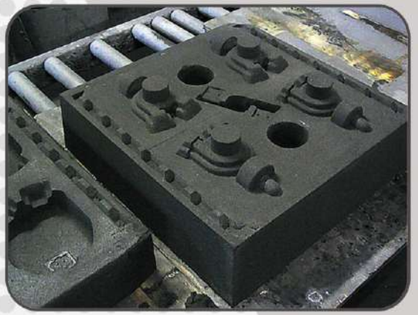
MELTING

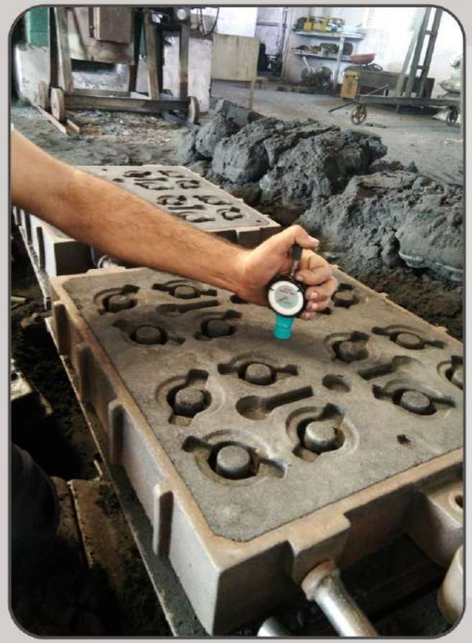
Melting process done under observation of experienced meltors and supervisors only. We check every bit of contents of the metals during the liquid form of metal. Once testing done then only it goes further for the next process.

Sangam Technocast

MOULDING - MAKING & TESTING

The molding done through numeric press. It is done so the better surface finishing can be given to the casting. The other advantage of this process is weight variation and it also maintains its standards. It helps to provide equal weight final casting in the end.





This machine is helpful to check hardness of the ready - mdding, and by using this it can be also useful to stop standwash in casting.

Sangam Technocast

CORE SHOOTER MACHINE

Latest technology yet very simple to operate, this featured machine is helpful for making qualitative and critical core.

Sangam Technocast

POURING

Sangam Technocast

FINISHED GOODS TESTING

Chemical, Physical & Micro Examination Testing Facility Available For the Ready Material.

Sangam Technocast

FETTLING SHOP

Fattling shop is featured with Batch Grainder, Chain Grainder and numeric grainder.

Sangam Technocast

MACHINE SHOP

According to the requirements of the clients, we finalised the casting into final machining. This process done at our sister concern place, which is equiped with latest technology and updated instruments packing & forwading facility is also available there so easily.
