

**“Aroma forging was established in 2015. We are Manufacture of closed die steel forging. We manufacture in various sectors like Automotive parts, Compressor parts & Transmission parts.”**

**About Us :**

We started our journey in Sept 2015. In the early days we used to forge Connecting Rods for 2 & 3 wheeler Sector by slowly learning with experience later we started forging other profile jobs of transmission and compressor parts. Aroma forging has covered an area of 20,700 Sq.ft. We forge products in all type of iron and steel bars materials.

**Process :**

Closed die forging is also known as a impression forging, In which dies move forward each other and covers the workpiece in whole or in part. The heated raw material, which is approximately the shape or size of the final forged part is placed in the bottom die. The shape of the forging is incorporated in the top or bottom die as a negative image. Coming from above the impact of the top die on the raw material forms it into the required forged form. Closed die is one of the forging type for small or medium metal components.

We manufacture small size products weight between 100gram - 1000 gram.

**Facilities :**

We truly believe that every product we forge is best in quality & 100% fail safe product. Our facilities include modern machinery Friction drop hammer ram weight range : 500 Kg, 750Kg, 1000Kg.

VMC machines to ensure smooth and accurate die making, Shearing machine for best cutting of raw materials which will later be used in forging, Shot Blasting machine so that every forged part is cleaned properly.

**Products :**

2-3 Wheeler Connecting rod

Compressor Connecting rod

Various Auto motive profiles

Transmission parts

**List of sectors served :**

- Automotive
- Air conditioning
- Agriculture
- General engineering
